PROFILE

I am a third-year Software Engineering student. In addition to my academic studies, I have taken part in individual and team-based software projects. I played an active role in team projects such as Teknofest. During this time, I improved my technical knowledge and problem-solving skills, and gained experience in teamwork and project coordination. With the leadership and organization experience I gained from student communities and volunteer work, I am looking for a software internship where I can apply my technical skills in real projects.

EXPERIENCE

- **C++:**
 - I developed several simple applications that run on a local network.
- **Java :**
 - Multi-Threading: I developed games and applications using multi-threaded structures with Java, focusing on performance and concurrency.
 - Online 2D Games: I developed 2D online games, designed the server side using Java, and hosted it on my own server.
- **Unity:**
 - I experienced developing online 2D games using game engines and developed a simple 2D online (Mirror) game.
- **BosnaGurbetcileri**
 - I developed a forum website for Turks in Bosnia and Herzegovina and hosted it on my own server.
- **Rack Server:**
 - I set up my own server to host my applications and games. I virtualized the server and rented it to my friends.
